

# Move Freely. Live Fully.

The advanced 5-type collagen formula for joint comfort and mobility.

Collagen Complex | Types I, II, III, IV, V | 90 Capsules

3rd Party Lab Tested

GMP Certified

Pharmaceutical Grade

Hormone Free

Non-GMO

Gluten Free

Support your joints with the collagen they were built on.

## Why Your Joints Need Collagen

Collagen makes up approximately 80% of all connective tissue in the body. It is the primary structural protein in cartilage, tendons, ligaments, and the synovial membrane that lines your joints. As collagen production declines with age, cartilage thins, joint lubrication decreases, and connective tissue becomes less resilient — leading to stiffness, discomfort, and reduced range of motion.

## The 5 Types Your Joints Need

### Type I — Bovine Hide

Reinforces the tendons and ligaments surrounding every joint. Provides the tensile strength that holds joints together through every movement and impact.

### Type II — Hydrolyzed Chicken

The primary structural protein of cartilage. Cushions and protects joint surfaces, absorbing the impact of every step and movement throughout the day.

### Type III — Bovine Hide

Supports the flexible connective tissue in joints and blood vessels, contributing to the overall resilience and elasticity of all joint structures.

### Type IV — Avian Sternum

Naturally delivers glucosamine, chondroitin, and hyaluronic acid — the three compounds most associated with joint lubrication and cartilage health.

### Type V — Eggshell Membrane

Organises collagen fibrils into the structured matrix that joints depend on, ensuring all collagen types work together as a cohesive support system.

**Five types. One formula. Complete joint support from within.**

## Why Choose Encore?

- 5 collagen types in one formula
- Third party lab tested for purity
- Non-GMO and gluten free
- Pharmaceutical grade ingredients
- 90-day money-back guarantee

## Five Premium Collagen Sources

<b>Bovine Hide</b> Types I & III	<b>Wild-Caught Marine</b> Type I	<b>Hydrolyzed Chicken</b> Type II	<b>Avian Sternum</b> Types II & IV	<b>Eggshell Membrane</b> Type V
-------------------------------------	-------------------------------------	--------------------------------------	---------------------------------------	------------------------------------

### Bovine Hide:

Grass-fed bovine collagen provides the structural framework for tendons and ligaments — the connective tissue that surrounds and supports every joint.

### Hydrolyzed Chicken:

The gold standard source of Type II collagen, directly targeting cartilage repair and maintenance — the cushioning layer between every joint surface.

### Eggshell Membrane:

Provides elastin and fibronectin alongside Type V collagen, supporting the flexible connective tissue that allows joints to move freely and comfortably.

### Wild-Caught Marine:

Marine collagen's small peptide size enables rapid absorption, ensuring collagen reaches joint tissue quickly and efficiently for faster support.

### Avian Sternum:

Naturally contains glucosamine, chondroitin, and hyaluronic acid — the complete joint lubrication matrix in a single, bioavailable source.

## What You Can Expect

- Reduced joint discomfort and morning stiffness
- Improved flexibility and range of motion
- Support for cartilage repair and maintenance
- Natural joint lubrication from hyaluronic acid
- Stronger tendons and ligaments
- Most users notice results within 6–8 weeks

## Did You Know?

### Cartilage can't self-repair

Cartilage has no blood supply, so it relies entirely on collagen supplementation to maintain itself.

### Type II is cartilage-specific

Type II collagen is the primary structural protein in cartilage — found in two of our five sources.

### Glucosamine + Collagen

Avian sternum naturally delivers glucosamine and chondroitin alongside collagen for complete joint support.

## Real Results from Real People

### Robert D., 58

"After 7 weeks on Encore Collagen the stiffness in my knees in the mornings has reduced significantly and I can walk much further without discomfort."

### David H., 64

"My physiotherapist recommended collagen for my joints. Encore is the only product I have tried that made a noticeable difference to my mobility and flexibility."

### Patricia L., 55

"I play tennis three times a week and the joint support from Encore has been remarkable. Less discomfort, better recovery, and I feel more flexible overall."

### James T., 61

"I have had knee problems for years. After 8 weeks on Encore Collagen the discomfort has reduced noticeably and I can climb stairs without dreading it. Remarkable product."

## How to Use

- Step 1:** Take 3 capsules daily with a full glass of water.
- Step 2:** Best taken in the morning with or without food.
- Step 3:** Use consistently for at least 6–8 weeks for best results.
- Step 4:** Combine with Vitamin C to support collagen synthesis.
